1 Introduction

Politecnico di Torino, thanks to the support of ASI, Agenzia Spaziale Italiana, offers to an Italian student of the 2nd level specializing master in "Navigation and related applications" A.Y. 2015/2016 the possibility to receive a scholarship. The ASI scholarship winner won't have to pay the tuition fees (8,000 Euro) foreseen for the specializing master program.

The Master Scientific Committee will assign, together with a representative of ASI, the scholarship on meritocratic basis.

2 Requirements

At the end of the selection process the candidate has to be admitted to attend the above mentioned course for the A.Y. 2015/2016.

"Admission requirements" and "how to apply" instructions are available at the following addresses:

Master Universitario di II livello in Navigation and related applications

- https://didattica.polito.it/master/navigation/2016/admission_requirements
- https://didattica.polito.it/master/navigation/2016/how_to_apply

Scholarships are available exclusively for a 2nd level specializing master in "Navigation and related applications" student with Italian citizenship.

3 Application

Candidates have to apply by **June 10th, 2015** (h 11:59 a.m., Italian time) exclusively through the on line application form (<http://apply.polito.it/>).

The scholarship winner will be selected among the students who have successfully completed and submitted the online application form.

All candidatures correctly received by the deadline will be taken into consideration for the ASI scholarship only if candidates specify to apply for them by flagging the proper field in the "Scholarship" section of the on line Application form. **Please be aware that if you don't flag the above-mentioned proper field you won't be taken into consideration for the scholarship.**

4 Selection process

The Master Scientific Committee will assign the scholarship on meritocratic basis.

Selection consists of:

- cv evaluation (in order to verify if the candidate has an experience related to the field of satellite navigation)
- university results evaluation (MSc final degree results specified in the academic transcript and/or medium of marks obtained)

The Master Scientific Committee will assign a maximum of 100 points on the basis of the following criteria:

- maximum **40** points related to the curriculum (working/study experience related to satellite navigation)

- maximum **60** points related to the university results (MSc final degree result; average related to the marks obtained in the exams; number of years in order to obtain the final degree)

At the end of the selection process, the scholarship winner will be published on the Politecnico website (<https://didattica.polito.it/master/navigation/2016/introduction>), at the page "Selection outcomes"; this will be considered as official communication.

The scholarship winner will have to confirm his/her participation through a relevant form to be filled in and sent by fax to +39/011/090 5730 or by email (master.universitari@polito.it) within a deadline that will be assigned (generally within 7-10 days).

In case that the selected candidate will not confirm his/her participation within the given deadline, the scholarship will be re-assigned to another student on reserve according to his/her position in the list. The candidates placed on the reserve list will be contacted only in case of renunciation of admitted candidate and they will be given a deadline to confirm their participation.

5 Scholarship details

The amount of the scholarship is 8,000 Euro, as a cover of the tuition fees, which will be paid directly by ASI to the Politecnico di Torino.

If the selected candidate quits the specializing master or does not obtain the specializing master degree, he/she will have to return the entire amount to Politecnico.

Note

The specializing master program can be only activated if the required number of participants is achieved prior to the course start date.

For this reason the scholarship won't be awarded in case the course won't be activated
