

Erasmus Mundus European Program (Action1)

SINCHEM PROJECT

SINCHEM is a three year international joint Doctoral project in Sustainable Industrial Chemistry offered by a consortium of 26 partner institutions (7 full partners and 19 associated members). Strong industrial links to major companies in the field are a key part of the consortium.

SINCHEM is an institutional project funded by the European Commission under the Erasmus Mundus Action 1 program. The project is coordinated by the **University of Bologna (Italy)** and the **Politecnico di Torino** participates as full partner institution.

SINCHEM seeks to exploit fundamental knowledge for the development of collaborations between high level academic and industrial teams across Europe for practical purposes. The main mission is to transfer sustainable/green chemistry from idea to innovation.

SINCHEM is addressed to **both European and non-European students**.

In the frame of this project, the Politecnico di Torino shall reserve **1 position in the PhD program in Chemical Engineering**.
